INCORPORATED 1903.

The Iowa Condensed Milk Co.

CAPITAL STOCK \$100,000.00

West Liberty, Iowa.

GUARANTEE:

This is rich cows' milk, unsweetened, reduced to a cream consistency, absolutely Pure. Free from all disease germs by reason of thorough sterilization, produced from dairies having weekly veterinary inspection under factory supervision. This cream is of the highest grade and quality and guaranteed to keep in perfect condition in all climates.

IOWA CONDENSED MILK CO.,
West Liberty, Iowa, U. S. A.

HAWKEYE

DIRECTIONS:

1 to 2 teaspoonfuls for Tea or Coffee, gives greater richness and better flavor than cream. Diluted with three parts of water makes it equal to ordinary cream. For infants, mix before using, with boiling water as follows: 1st month, 7 parts of water to 1 part of cream, 2nd month, 6 parts of water to 1 part of cream. Afterward increase according to strength and age of child. For Ice-cream and culinary purposes, dilute to suit taste of user. Shake the Can well before opening.
IOWA CONDENSED MILK CO.,
West Liberty, Iowa, U. S. A.

OPEN CAN AT UNSEALED END. ALLOW CAN TO REMAIN PARTIALLY OPEN.

DIRECTIONS FOR INFANTS.

FIRST MONTH—To one part of milk add 14 to 16 parts of water, thoroughly boiled and allowed to cool before using. Reduce the water gradually as the child grows older and stronger, so that a child one year old can take one part of milk to six or seven of water.

FOR CULINARY PURPOSES—(Puddings, Custards, etc.) add four to five parts of water to one of milk.

GUARANTEE.

This Brand of Condensed Milk is Guaranteed to be perfectly Pure, and of the Highest Grade, with nothing added except the best refined cane sugar. It is especially prepared for children, and can be used for all purposes for which milk or cream is required.

IOWA CONDENSED MILK CO.,
West Liberty,
Iowa.

FOR COFFEE, TEA OR CHOCOLATE IT IS NOT EQUALLED BY THE BEST CREAM.

BEST EQUIPPED MILK PLANT

Iowa Condensed Milk Company a Success—Factory Is Located at West Liberty.

The Iowa Condensed Milk company of West Liberty, Ia., capitalized at \$100,000, owns the largest and best equipped plant of this kind west of the Mississippi river. The main building is of brick, 150 feet long by 54 feet wide, three story and basement, with a large boiler house, ice house, receiving room and coal shed attached.

They are engaged in the manufacture of evaporated cream and condensed milk, equal to the best on the market, and their goods, under the Hawkeye brand, are now in general use from Duluth to New Orleans.

The capacity of the plant is 100,000 pounds of fluid milk daily, the employes numbering sixty at this capacity.

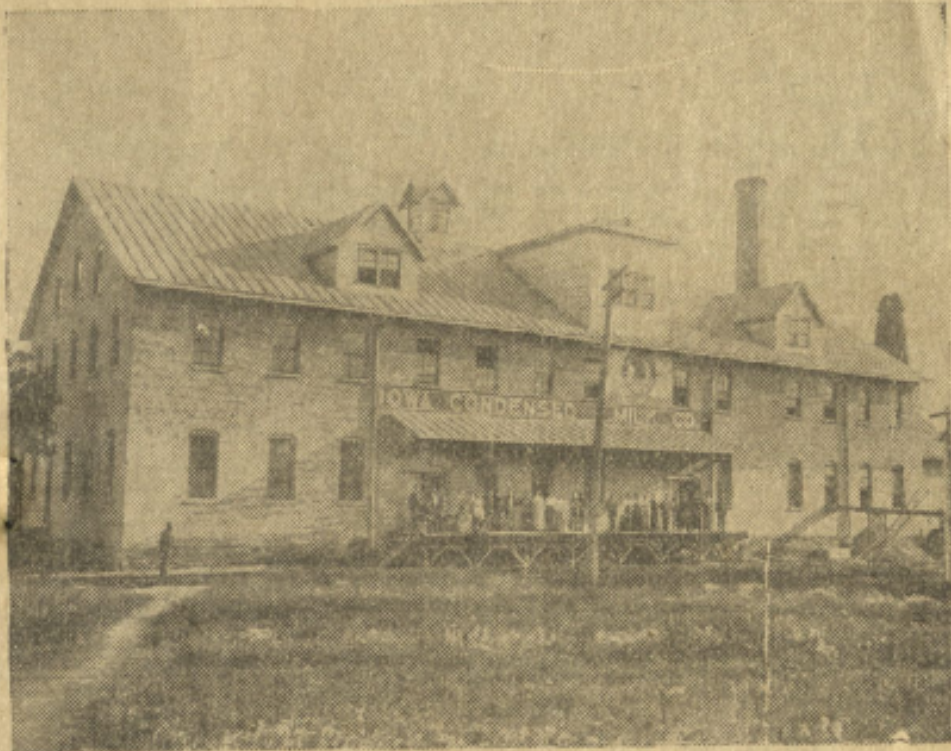

There is, in connection with the factory, a modern tin plant for making cans, with a capacity of 100,000 cans daily.

The factory was located at West Liberty after a very careful investigation of the Mississippi valley by an expert from the east, for the reason that this locality is unequalled for its large and prosperous farms, progressive farmers, unsurpassed grazing land of bluegrass and white clover, and unlimited supply of pure water.

The company has just completed a deep well, drilled under contract to furnish three hundred gallons of water per minute. The flow was attained at a depth of 1,700 feet, from sand stone. The company feels very much elated over this well, as a perpetual flow of pure water is one of the factors in the successful manufacture of a superior quality of condensed milk. In the manufacture of the above mentioned amount of milk it is necessary to use at least 128,000 gallons of water per day.

The company has been fortunate in securing the service of experienced men in this line, having at the head of the manufacturing department a man of fifteen years' experience and unusual ability.

The use of evaporated cream and condensed milk is increasing very rapidly, especially in cities and large towns, as it is a recognized fact that this food is thoroughly hygienic—the purest product in the line of milk.
