

Technical work complete 19 November 1918.

All books are accessioned.

All books, down to and including the accession no. 2507, are classified and shelf-listed with the exception of the reference sets, the bound magazines and the material on the top shelf.

An author and title list has been started. The adult 900's, 811's-899's, 600's and 300's are complete.

A withdrawal book has been started after taking an inventory from the accession book.

# Simplified Accession Book

## Explanation of Simplified Accession Book

---

The accession book is a brief inventory of all volumes ever owned by a library, and the entries being in the order of addition to the library it shows the chronological growth. It is the most permanent of all library records as there is no danger of losing or misplacing entries, and it is the final reference for doubtful points. Various valuable statistics may be secured from the accession record; how many volumes ever owned, how many added through purchase, how many through gift, how many discarded and an invoice through the cost column which gives the basis for insurance.

### Place of accessioning in the routine

Accessioning follows checking of bill, cost of each book having been written in inner margin of first recto (the right-hand page) after title page, with date of bill and dealer's surname.

### Order of entry

Enter one volume to a line and never under any circumstances give the same number to two volumes or to whole sets. No two books should have the same accession number even if the original is lost, sold, exchanged or condemned and an exact duplicate obtained.

### Date

The date used should be the date of bill, and if necessary to enter books of a later bill before an earlier one, do so, but never count off lines to allow space for the earlier bill. Use the short abbreviations for dates.

### Accession number

Write the accession number in the book in ink on the lower margin of the first recto after the title page, and it is a good practice to enter the number the first thing before any writing is done in the book, as it is sometimes omitted entirely if left for haphazard entry.

The accession number written on the book card and pocket helps in the identification of the book in the charging system, and is especially desirable when no book numbers are used on the fiction.

### Author

Keep within the author column, writing above the line if necessary.

Use the surname as given on the title page, omitting initials, but for pseudonyms write in full, if a well-known name like Mark Twain. When both real name and pseudonym appears on title page enter under best known form.

For joint authors use both surnames with & sign between.

When a book is by several authors, use the first " & others" if more than two, or enter only by title if many.

For classics, use the best known form of the title for the author, e. g. Arabian nights, in the author column with the title repeated as it stands on the title page, in the title column.

Publications of city, state or federal governments should have the regular catalogue entry in the author column, the name of city, state or country followed by name of department or office responsible for publication of the work, e. g. U. S.—Education dep't; Chicago—Board of trade; Wis.—Dairy & food com'n. Abbreviate such author entries as much as possible in order to save space.

Enter under official name of a body or organization responsible for a work, not under the editor or compiler, e. g. A. L. A. Proceedings 1896-97.

Enter under editor or compiler as author, only when wholly responsible for the work, e. g. Palgrave, ed. Golden treasury. When compiled or edited by several persons, use first surname " & others," e. g. Yale & others, ed.

Prefix names should follow catalogue entry, e. g. Amieis, not De Amieis.

Periodicals should be entered only in the title column, never in the author column. Follow the entry with dates covered by the volume.

When works by two different authors are bound together, use surname of first author in author column, and add title and author of second work after title of first work in title column.

### Title

Use brief title, omitting initial article except when sense would be destroyed.

Never capitalize after an article if it is used, and do not put curves around the article as in cataloguing. Do not use capitals for any words in the title except proper nouns and adjectives. Use no punctuation except for abbreviations and a period at the end of title.

If a book contains two works by one author give both in title column with & sign between, beginning second title with a capital.

Give dates of proceedings, e. g. 1900-01, after title.

### Publisher

Give surname of first publisher named.

Give all surnames in firm if necessary to distinguish between similar firm names.

### Year of publication

Use title page date if given, otherwise last copyright date, or preface date. Do not use brackets if date is supplied from some source other than title page. If no date is found use abbreviation n. d. (no date).

### Volume

Enter number of volume if more than one in the volume column. Enter the number of parts if in parts, e. g. <sup>2</sup> pt. 1. Indicate series numbers when more than one as in the case of some periodicals, e. g. <sup>n. s. 13</sup> o. s. 26 (new series 13, old series 26). If two volumes are bound in one they may be indicated in this way, 2 in 1. Do not use an abbreviation, v. or vol. in the volume column. Simply the number itself is sufficient.

### Source

The surname of the dealer should be used when the volume has been purchased. For gifts use the name of the donor with initials. For books added by binding give the name of the binder.

### Cost

Enter the actual cost in dollars and cents. Do not divide the cost of several volumes in a set, but give total opposite the first volume entered.

### Added by

By checking on the line of the book, in the columns headed, Gift, Binding, it is possible to keep count of these different sources and the number of volumes added from them to the library in a given period. It is important to keep these records separate in order to save time when the annual report is made up.

### Rebinding

The cost and number of books rebound may be kept in this column and the same figured up at the end of the year with very little added effort.

### Withdrawn

It is necessary to keep a record of books withdrawn that the actual number of volumes in the library may be ascertained by subtracting the number of withdrawals from the total accession number.

### Remarks

In the remarks column may be written any information desired not already provided for in the other columns.

### Ditto

The ditto mark is a great time saver in accessioning long sets and may be used to advantage wherever possible. One ditto mark is sufficient in a column and the rows should be evenly kept.
