The class of goods to be handled, lifting capacity wanted, if walls, stairway, or any object near hatch, give distance from same; if hatch is not made give size of platform wanted between posts; [the posts are 6 or 8 inches, and the side of the platform where the ropes come is notched, so there are 6 or 7 inches outside of the braces for the operator to stand, in case of loaded car]; if power elevator is wanted, state position of shaft, and speed of same.

We build elevators to suit our customers, furnishing everything complete, or otherwise. Platforms any size desired. All woodwork is hard wood except the large timbers and weight boxes. Satisfaction guaranteed.
